

ERM / ERS: Sharper Decisions. Stronger Teams. Safer Operations.

Secure Your Place

Why ERM/ERS Training Matters

Safe engine room operations rely on more than technical expertise. ERM/ERS equips engineering teams with the practical behaviours needed to strengthen teamwork, situational awareness and operational performance in both routine and high-pressure environments.

Train in Realistic Engine Room Scenarios

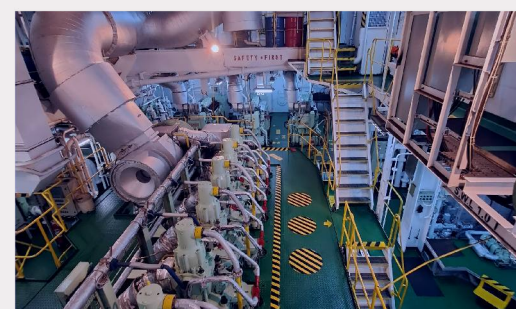

Operate with Confidence

Build the practical skills to manage routine engine room operations safely and efficiently.

Train Beyond Theory

Experience realistic engine room scenarios on the latest Wärtsilä ERS TechSim Simulator.

Critical Response

Act decisively and maintain control during high-pressure engine room situations.

Because safe engine room operations depend
on more than technical expertise.
